

March 20, 2014

Bruce Fogelsong
Schlumberger

Dear Bruce,

On behalf of Energistics and the Board of Directors, I would like to thank you for your continued support and valuable contributions to the Energistics community in 2014. The time you contribute to Energistics and to the development and support of our open and freely available standards has not gone unnoticed and provides business value to the upstream industry.

The Energistics Volunteer Recognition Program recognizes those who have made outstanding contributions to the development and adoption of the Energistics standards during the year. This program includes a letter to our member company business representatives recognizing those from their organization who have contributed as well as letters to the individual contributors. We also will continue hosting team recognition dinners when the teams meet in person, two to three times annually.

We recognize that you have a day job and truly appreciate the time you devoted to Energistics throughout 2014. Your contributions to the WITSML SIG and ETP are invaluable.

We look forward to working with you in 2015.

Sincerely,

Jana E. Schey

Interim CEO & Vice President, Operations
